

Advanced Medical-Grade All-in-One Computer for Healthcare Applications

Your best choice for:

- EMR/ EHR software applications
- Critical care environments
- Operating room (Pre/ Post OR)
- ICU & ED vital sign monitoring
- Lab info and diagnosis support
- DICOM to PACS and medical imaging
- Medical equipment control
- Surgical modeling
- Anesthesia system management

Medical-Grade Certified

UL/EN60601-1 3rd Edition certified, including fully isolated I/O for integration in medical devices. Safety insulated.

System Performance

Embedded Intel® Core™ i7 Processor for high-end computing and graphics throughout the product life cycle.

Infection Control (IP54 & Fanless)

Smartly enclosed with special cable routing in water & dust proof casing to guard against bacteria.

Edge-to-edge IPS LCD

State-of-the-art panel is equipped with IPS display and PCAP touch module; the combination nowadays is the top choice for high-end, all-in-one PCs, providing better color, better movement, and a more intuitive experience.

Reliability (RDT/HALT Test)

Advantech spares no expense in durability testing. Standard 3-year warranty, extendable to 5 years.

Flexibility

Advantech meets specific needs for different healthcare providers. Easy-maintenance design allows configuration changes and updates to be made in the field.

The 24" Point-of-Care Terminals for Radiology & Endoscope Applications

Accommodates Multiple Applications

PCIe x4 card slot increases the advanced medical-use card solutions pool

Better Image Solutions

- Dark margin & IPS display for vivid, clear images, and without color wash
- DICOM preset available
- Supports Full HD up to 1920 x 1080 WVGXA
- Desirable size for PDMS Software; perfect for software layouts; True flat screen, free of dust
- Advanced designed with 10-pt multi-touch; senses input even through gloves

POC_Link Remote Management

- Flexible software development at client site 24/7 data upload without interruption
- Provides PC health, network status, and battery info for IT monitoring
- Intel® Active Management Technology provides a clean, user-friendly UI; simplifies management from a centralized console
